## Clean energy for EU islands

### Editorial

Welcome to the next phase of the EU islands secretariat!

We are delighted we got the green light to continue supporting island communities with their energy transition in the next four years.

Under the slogan 30 for 30, the EU islands secretariat will work towards 30 renewable energy islands by 2030. We have a lot of activities planned for the next years.

Our technical assistance will be featured more prominently with an expert network of more than 100 experts available, covering not only the power sector but also local engagement, transport, heating and cooling and pockets of industry.

Upcoming workshops and trainings will allow for island-to-island exchange, on the islands. We will weave them into the 30 renewable energy islands to enable active and peer-to-peer learning by bringing stakeholders, follower islands and experts together.

Our communication will go local, uniting islands at EU-wide events, connecting through social media engagement and making islands the face of the [Clean energy for EU islands initiative in videos](#).

We will be updating the [regulatory inventory](#). Based on the inventory, the study on the improvement of grid capacity will go deeper into the matter to remove this common barrier to renewable energy development on islands.

In short, we stick to our motto Explore, Shape and Act and move more to Shape and Act as the secretariat progresses. And we already have one top activity for you – Join us for this year's EU island forum in Estonia on 7 and 8 June.

It's your energy transition. We are very happy to be there to give you wind in the sails.

Jan Cornillie, Clean energy for EU islands secretariat coordinator

## Clean energy for EU islands forum 2023 | 7- 8 JUNE – Register Now!

In 2023 we will select 30 islands that want to become fully renewable by 2030. Achieving fully renewable-energy-powered islands is the North Star objective for the third phase of the Clean energy for EU islands secretariat. At the #CE4EUislands forum 2023, we will discuss all the building blocks to be able to achieve that ambition.

## Call for Videos - Views from the Islands

With a new call for videos, the Clean energy for EU islands secretariat is asking island communities to share videos of their clean energy transition and ambition! Our aim is to bring your inspiring stories to life in our upcoming #CE4EUislands forum (7 & 8 June) in Saaremaa, Estonia.
