ID-E Webinar Series #6: Time to register!

The Investors Dialogue on Energy will host its sixth webinar on the topic of the Net-Zero Industry Act on Friday 7 June!

Date: Friday, 7 June 2024

Time: 10:00 – 11:30 CET

Join us for a webinar with DG ENER and DG GROW that will present the [Net-Zero Industry Act \(NZIA\)](#), a key legislation reshaping the landscape for clean energy investments. Being a key pillar of the European Commission's Green Deal Industrial Plan, NZIA will enhance the competitiveness and resilience of the European net-zero technologies industry and aim at fostering investments in the sector. NZIA sets a **benchmark for the manufacturing capacity of net-zero technologies to meet at least 40% of the EU's annual deployment needs by 2030**.

Why it matters? A secure and robust supply of clean energy technologies is essential for accelerating the energy transition. Despite the EU's strong manufacturing base in sectors like wind energy and heat pumps, EU market shares are falling. Over 90% of the PV modules deployed in Europe originate from China. To bolster resilient value chains in Europe and diversify supply, the European Commission has introduced legislative initiatives such as the Critical

Raw Material Act and NZIA, offering new opportunities for energy and investment stakeholders.

What is in for you?

- Understanding NZIA's objectives and key measures such as non-price criteria, streamlined permitting procedures, strategic projects, net-zero acceleration valleys, and linkages to financing tools.
- Providing your feedback on the implementation of NZIA.

Don't miss this opportunity to gain valuable perspectives on new investment opportunities and contribute to shaping the future of clean energy manufacturing in the EU.
