2nd SRI Joint Event: Just a few seats left !

The 2nd SRI Joint Event (Tuesday, 8 October 2024, Hybrid, Brussels) will once again be a unique opportunity to discuss the smart readiness of European buildings.

It combines the 5th plenary meeting of the SRI platform in the morning, jointly organised by DG ENER and CINEA, with roundtables to share experiences related to SRI implementation, organized by SRI2MARKET in the afternoon.

🕒 If you are planning to join us in person in Brussels, there are only a few seats left. Therefore, we recommend that you register as soon as possible. Online registrations will remain possible until the last moment.

For further details and registration, please visit [here](#).

LIFE Clean Energy Transition projects' updates

Four LIFE Clean Energy Transition projects (easySRI, Smart Square, SRI-ENACT, and SRI2MARKET) have formed a cluster that brings together 42 partners from 16 countries. Together, they are contributing to the implementation and successful market uptake of the SRI.

Here's a brief update on what's happening in each of them:

- **SRI-ENACT** ➡ Discover the newly released SRI-ENACT [Guidebook](#), providing comprehensive guidelines on applying the SRI-ENACT methodology across different building types and using the toolkit for SRI score assessments. ➡ Don't miss the [first of five training webinars](#), starting on 24 October, focused on SRI fundamentals.
- **Smart Square** ➡ Smart Square is finalising the CEN Workshop Agreement for SRI On-Site Audits, set to be completed by January 2025. ➡ The [Smart-Ready-Go! tool](#) now offers advanced features, and a new SRI Virtual Training Center is launching soon to support SRI implementation skills.
- **SRI2MARKET** ➡ [SRI2MARKET](#) launched its [assessment tool](#) and [e-learning materials](#), both available in seven languages, while also building [national SRI Communities on LinkedIn](#).
- **EasySRI** ➡ EasySRI has developed and validated an API-based calculation engine for Methodology A & B, while also establishing a comprehensive [SRT catalogue](#) linking SRI improvements with cost-optimized energy savings through a factor-based Life Cycle Cost analysis.

📅 **Mark your calendars and meet the projects !**

The four projects recently participated in [Sustainable Places 2024](#) in Luxembourg and will exhibit at the [1st International SRI Conference](#) (14-15

October 2024, Karlsruhe, Germany), as well as [Enlit Europe](#) (22-24 October 2024, Milan, Italy).

News and updates on the implementation of the smart readiness indicator (SRI) under the energy performance of buildings directive (EPBD).
